EDUCATION

Baylor University

BBA Management Information Systems, Data Analytics Certificate

Waco, TX

Aug. 2020 – May 2024

EXPERIENCE

Linebackers Position Coach

Gulf Shores High School

Jan. 2026 – Present

Gulf Shores, AL

- Built an automated breakdown generator that provides opponent tendency insights using Hudl data.
- Built an in-game charting sheet that tracks live defensive statistics, situational performance, and visualizes metrics for our staff.

Varsity Defensive Coordinator

Midland Christian High School

Mar. 2025 – Dec. 2025

Midland, TX

- Coordinated a high-performing defense that allowed 23.1 points per game.
- Created an improved in-game insight spreadsheet that charted success rate and other statistics.
- All eleven defensive starters earned all-district honors in TAPPS Division I-D2

Data Analyst & Writing Intern

Campus2Canton

Jul. 2023 – Aug. 2025

Austin, TX

- Engineered an interactive NFL Player Plotter tool using PFF data, employing Python and CustomTkinter to enable customizable metric comparisons among players, enhancing user experience.
- Programmed data visualization scripts in Python to map and analyze pressure grades of college and professional quarterbacks, uncovering critical performance insights.
- Cleaned datasets in R Studio, to be used in machine learning scripts for our website tools.

Information Technology Specialist

Apollo Information Systems

Jul. 2023 – Aug. 2024

Round Rock, TX

- Built Azure chatbot to automate internal document requests.
- Implemented automation of weekly newsletters through HubSpot, increasing marketing productivity.

Data Analyst Intern

GreySteel

Jun. 2021 – Aug. 2021

Austin, TX

- Migrated datasets from multiple sources into Salesforce, enhancing market intelligence.
- Conducted financial analysis of multi-family complexes, to aid in investment evaluations.

PROJECTS

BreakdownGenerator | Python, FastAPI, Supabase, Render | BreakdownGenerator.com

Jan. 2026

- Built and deployed a football research tool using Python, FastAPI, Supabase, and Hudl play-by-play data to transform raw tagged data into opponent scouting reports, situational tendencies, and shareable PDF game-planning materials for coaching staffs.

Elite 11 Analysis | R, gt | [Elite 11 Analysis](https://Elite11Analysis.com)

Feb. 2024

- Published article explaining the importance of the Elite 11 using statistical tables created with R. Collected Elite 11 data through web scraping and compared Elite 11 MVPs and Elite 11 finalists, in a fantasy production perspective.

Run Pass Predictor App | R Shiny, XGBoost | [Run Pass Predictor](https://RunPassPredictor.com)

Nov. 2025

- Built an R Shiny app that trains an XGBoost run/pass model from Hudl play-by-play data, checks for overfitting, tunes optimal nrounds, and outputs probabilities, tendencies, and matching-play evidence.

GUI Player Plotter | Python, CustomTkinter | [GUI Player Plotter](https://GUIPlayerPlotter.com)

Aug. 2023

- Designed a GUI using Custom Tkinter that enables users to choose a pair of quarterbacks and dynamically generate visual comparisons of various performance metrics drawn from PFF.

Mahomes vs. Brady | R, ggplot | [MVB](https://MVB.com)

Feb. 2025

- Analyzed Tom Brady's and Patrick Mahomes' Super Bowl opponents using EPA-based visualizations in R.

SKILLS

Languages: Python, R, SQL

Visualization: Tableau, Power BI, JMP

Course Work: Advanced Python, Database Foundation, Systems Analysis & Design, Data Visualization

Libraries: pandas, NumPy, Matplotlib, XGBoost, gt, Shiny
